

ABN: 40 626 319 944

Product Description

The CROWN Safety Tap allows the user to easily disconnect and remove the tap handle piece, in order to render the tap inoperable.

When inoperable, water cannot be dispensed via the tap.

Product Uses

The CROWN Safety Tap is ideal for use in settings where *(generally due to health and safety considerations)* there is a need to ensure hot water cannot be dispensed from the hot water unit at certain times or in specific circumstances.

Product Features

The Tap Handle Remove and Replace pin mechanism is a push-button quick release pin.

Key features are:

- 304 Stainless Steel
- Ball Locking Pin
- Button Handle, and
- Lanyard with securing bracket

CROWN SAFETY TAP

Product Code: HU001BS

INFORMATION SHEET

Tap Handle Removal

- Simply clasp the push button pin, as per the picture below.
- Hold the tap handle with your other hand as you push on the pin button with your thumb and pull the pin at the same time.
- When you push the button, it releases the two spring loaded balls which secure the handle to the tap.
- With a small amount of effort, the pin will pull out and the tap handle will be disconnected.

Tap Handle Replacement

- Place the handle in position ensuring all holes are aligned then clasp the push button pin, as per the picture above.
- Push on the pin button as you push the pin itself through the holes until the pin can go no further. It will be a firm fit.
- The tap will now operate.
